

MPA Engineering is one of the leading authorities in industrial automation systems within Australia. We offer a 24 hour industrial breakdown service to our clients.

Our trained teams cover all aspects of industrial work offering a complete installation package. Our services include but are not limited to:

- Transportable switchboard installation
- Installation of control and instrumentation equipment
- Radio telemetry installation
- Process and control system installation
- Cable, fibre and wireless network installation
- Installation and commissioning of industrial plants
- Small project installations
- General electrical maintenance and electrical break-down projects
- General electrical auditing for AS/NZ compliance
- Hazardous area installations
- Earthing and lightning protection installations

MPA Engineering stocks and distributes a comprehensive range of electrical automation and control equipment as well as accessories to suit most industrial applications. The product range is specifically tailored to meet the needs of our diverse client base and is available either as standard, off-the-shelf products or customised to meet specific requirements. With technical support from our in-house team of engineers and electricians, our product sales team provides a complete automation solution for customers. We ensure we stay at the forefront of the latest trends and developments in automation products to ensure that we offer the most up-to-date products to our customers.
